- Firewall Configuration · Secure Coding · Cloud Security Fundamentals
- Penetration Testing (Beginner) · System Monitoring & Auditing

Programming & Development

- Languages: Python · C# · JavaScript · HTML · CSS
- Frameworks: React · Node.js · .NET · Express · Redux · WordPress
- Databases: PostgreSQL · MySQL
- Tools: Git · CLI · Virtual Machines · Kali Linux · Wireshark · Nmap

Professional Experience

IT & Cybersecurity Specialist (Freelance / Contract)

July 2018 – Present

- Conducted vulnerability assessments and basic penetration testing using Kali Linux, Nmap, and Wireshark.
- Hardened Linux and Windows systems to reduce attack surfaces and improve resilience.
- Secured WordPress and web applications, identifying and patching vulnerabilities.
- Implemented network security protocols to protect data and prevent unauthorized access.
- Provided IT support for small businesses, including network setup and troubleshooting.

Apex Media Solutions – IT Specialist / Cybersecurity Support

June 2024 – October 2024

- Managed Google Business accounts with strict access control policies.
- Audited and enhanced website security for multiple clients.
- Performed competitor analysis to identify digital security gaps.
- Used Zoho CRM to securely manage client data and workflows.

Premium Peanut – IT & Frontend Developer

March 2022 – July 2022

- Supported migration of C#/.NET applications with improved security protocols.
- Updated legacy systems and patched vulnerabilities across internal infrastructure.
- Applied secure JavaScript practices to prevent XSS and SQL injection exploits.

Dell Computers – Help Desk Support Technician

1999 – 2005

- Delivered technical support and troubleshooting in a high-volume environment.
- Diagnosed hardware issues, performed system repairs, and installed software.
- Managed IT support tickets and ensured timely resolution.
- Gained hands-on experience with Windows administration and basic networking.

Projects & Additional Experience

- Developed secure web applications using React, Node.js, and PostgreSQL.
- Implemented cybersecurity best practices in WordPress and e-commerce platforms.
- Practiced ethical hacking techniques using Kali Linux, Wireshark, and Nmap.
- Configured and monitored Linux systems with access control and patch management.
